TRAIN HELD UP BY LONE ROBBER

But Is Overpowered by Brave Conductor

AND IS PLACED IN PRISON

Masked Bandit Holds Up Train and Robs Passengers—Booty Is Recovered and Restored to Owners—Is a Noted Highwayman.

Kansas City, Nov. 27.—One of the most unique and daring train robberies in the history of the southwest was committed one hundred miles east of Kansas City early Monday.

Between Slater and Armstrong, Mo., a distance of 21 miles, a masked man, single handed, robbed 20 passengers, in three cars of the fast eastbound combination of Chicago, Burlington and Quincy passenger train. After half an hour's work he secured approximately $2,000, besides several watches and other pieces of jewelry. The man finally was overpowered by E. B. Heywood, the conductor, who knocked a raised revolver from the robber's hand and forced him to the car floor.

The robber was bound, made to disgorge and four hours after the robbery was committed, was placed in jail.

The robber, who said his name was Trucheart, and that he came from California, was recognized by the engineer as the same man who in November in exactly the same manner, and the same place on the same road, went through the sleeper on an eastbound Chicago, Rock Island and Pacific Overland limited, which, on this division runs over the Alton tracks. Trueheart, who refused to give his full name or tell what town he came from, said that it was his brother who held up the Rock Island train. The train was No. 24, which left Kansas City at 9 o'clock Sunday night. From Kansas City to Mexico the train is run over the Alton tracks. At Mexico it is cut in two the Alton portion continuing to Chicago and the Burlington portion going to St. Louis.

The train reached Slater at midnight, and when it started out of that place five minutes later, Trueheart boarded the smoking car. His eyes were covered by a mask. Leveling a revolver at two passengers in the seat nearest the door, he ordered them to pass over their money and valuables and to do it quickly. The men complied, and when Trueheart placed the stuff beneath his belt and proceeded to give his command in a loud voice to the man in the next seat forward, the car full of passengers was fully aroused and ready to comply. When the robber had systematically robbed the passengers in the smoker of their belongings, he passed to the door, keeping them covered. It was 35 minutes' run to Glasgow from Slater, and he awaited the arrival at the latter place. As the train stopped at Glasgow he swung off and boarded the chair car as it rushed by a moment later. Through the chair car the robber's tactics in the smoker were repeated. Next he entered a sleeper and began again his command to luckless passengers to surrender their valuables. Conductor Heywood appeared on the scene here and Trueheart, with the command "Throw up your hands!" pointed his revolver at the conductor's breast. Instead of complying, the conductor quick as a flash knocked the revolver from the robber's hand, threw himself on the man and bore him to the car floor. The two men struggled fiercely while the passengers were instantly in a panic.

Finally, the dozen male passengers in the car came to the conductor's aid and the robber was literally pinned to the floor.

When Armstrong was reached at 12:50 a. m., a marshal boarded the train and Trueheart was tied hand and foot and taken into the station. He refused to talk, except to berate the passengers for cowardice and to declare that Heywood was the only brave one among them.

The money and jewelry was taken from him, and after more delay and confusion among the exicted passengers, the train continued.

Trueheart was taken to Glasgow and placed in jail. He appears to be 3 years of age. He is 5 feet, 5 inches in height and weighs about 135 pounds. His description tallies with that of the Rock Island robber and the engineer of Sunday night's robbed train positively identified him as the same identical man.

The Sheriff and Posse Are In Pursiut of the Fugitives, But Without any Distinct Clew as to Direction They Had Taken.

Palatka, Fla., Nov. 27—The county jail here was broken open Sunday night and nine prisoners escaped, including three alleged murderers.

Will Dumas, George Valle and Geo. Brown, all negroes, and in jail for killing negro men, are among those who escaped. Seven were negroes and two were white men.

In some way one of the prisoners got the lock to the cages unlocked and last night at 7 they began picking a hole with an ax in the brick wall and succeeded in getting out at 3 o'clock Monday morning.

One negro prisoner, Robert Reed, refused to join them in breaking the jail and reported the matter as soon as they had gone. He said they had planned to go in groups of two or three.

The shooting was the result of a trivial quarrel. The mine is over 200 feet deep, and it would be necessary for each member of a posse to carry a light if an attempt were made to get Shuley, who is known to be armed with a shotgun and plenty of ammunition, who could make a desperate resistance from the dark caves and rooms in the mine. A party is guarding the main way and if the murderer attempts to come out he will be captured, or killed.

When the steamer arrived here it was found that she was missing. Her berth had not been occupied and her open suit case, cloak, hat and shoes were in her statercom. It is supposed that she leaped overboard at an early hour Sunday morning.

The burning of the schoolship cr ated the greatest alarm throughout t city. The people rushed to t docks, whence they could see the A geciras, a mass of flames in the ha bor. The burning vessel stood o brilliantly in the encircling darkne and the glare of the flames lit up t other shipping and the coast and t wharves.

There was terrible anxiety concer ing the fate of the 500 men on boa until the authorities announced th everybody had been taken off in t boats and saved with the exception three. These men did not answ the roll call, and it is presumed th were burned to death.

The small boats of the Algeci were launched, filled with men an rowed away, while those who cou not leave in this manner, awaited th arrival of their rescuers. A few the men, however, were forced b the flames to jump overboard an swim away. Six torpedoes on boar the schoolship exploded while th men were leaving the ship.

There was much fear during th height of the fire that a torpedo mag azine on shore would become ignited but this was prevented by deluging the magazine with heavy streams water from powerful fire boats.

It is not known whether the fi originated from an explosion of pow der, or broke out among the store on board.

The defendant was found guilty of aggravated assault, and was sentenced to serve six months in the county jail, after a severe reprimand and lecture by the court.

Other cases tried were of the State vs. J. H. Truby, Henry McMillan and Tom Mack, all charged with selling liquor in a county which had voted against the sale of same, and in each case the jury returned a verdict of not guilty. Only four of eight cases of this character have been convicted during the present term of the court.

The sentences imposed by the court were as follows:

Lillie McMillan, selling liquor in a county which has voted against the sale of same, fine of $500 and costs, or twelve months.

Daniel Simms, assault and battery, six months.

Fred Reinhardt, selling liquor in a county which had voted against the sale of same, $500 and costs or twelve months.

For Bronchitis

TAKE VINOL

it heals the bronchial tubes and remedies the cough

For centuries old-fashioned cod liver oil has been prescribed by physicians the world over for coughs, bronchitis, weak lungs and consumption, but many could not take it on account of the useless fatty, fishy oil which enveloped the medicinal curatives, and it often failed to help those who could take it because it upset the stomach.

Anyone can take the delicious cod liver preparation, Vinol, which contains all the medicinal curatives and body-building elements of cod liver oil actually taken from fresh cods' livers, but no oil or grease, and wherever old-fashioned cod liver oil or emulsions would do good, Vinol will do far more good for all bronchial and lung troubles.

We ask every person in Gainesville suffering from chronic colds, coughs, bronchitis or weak lungs to try Vinol on our guarantee.—W. M. Johnson, Druggist.

NOTE.—While we are sole agent for Vinol in Gainesville, it is now for sale at the leading drug store in nearly every town and city in the country. Look for the Vinol agency in your town.

NEWS OF CITY AND COUNTY CONDENSED

Mrs. T. W. Pitts and interesting little daughter, Miss Curtis, have returned from Tampa, where they spent several days visiting the former's husband and taking in the great State Fair.

L. J Burkhim and son, L. J. Jr., left yesterday for Birmingham, Ala., where they went to attend the marriage of Mr. Burkhim's nephew, L. C. Ball, to Miss Spero, which occurs tonight. The prospective groom is a son of Harmon Ball of Tallahassee, and is well known throughout this section, where he has visited often. His friends will extend congratulations.

Mr. and Mrs. John W. Ettel have arrived in the city from their summer home at Fairhope, on Mobile bay, Alabama, where they have been for the past few months. It will be remembered that they had quite an experience in the big storm, a column account of which appeared in The Sun. Their beautiful home was badly damaged by high wind and water, but with energy commendable they began at once to build it up again. Their friends are delighted to welcome them here again, prior to their departure for White Springs, where they will soon re-open their splendid hotel, The Hamilton, for the season.

PILES CURED IN 6 TO 14 DAYS.

PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50c.

State Fair at Tampa.

On account of the Florida State Mid-Winter Fair at Tampa, Nov. 14th to 29th, the Atlantic Coast Line Railway will sell tickets for one fare plus 75 cents (including admission coupon) for the round trip. These tickets will be on sale from points north and west of Archer, Gainesville, Rochelle, Hawthorn and Palatka, including these points, Nov. 13, 15, 17, 20, 22, 24, 27 and 29th. From points south of the above points and not including them Nov. 14th and daily thereafter except Saturday and Sunday up to and including all trains scheduled to arrive in Tampa before noon of Nov. 29th. Final limit leaving Tampa Nov. 30th.

The Tampa Fair this year will be on a much larger scale than heretofore and large crowds will go from all points in this and other States. It will be an excellent opportunity to meet old friends and renew pleasant acquaintances.

Full information can be had from all Atlantic Coast Line agents or from Frank C. Boylston, District Passenger Agent, Atlantic Coast Line, Jacksonville, Fla.

He Killed Wife and Himself.

Toledo, O., Nov. 27.—Mr. and Mrs. James Scott Mitchell, of Salem, Mass., were found dead in bed in a rooming house at Bellevue, east of here Sunday morning. When their room was entered a strong odor of formaldehyde gas was noticed. Coroner Vermilye rendered a verdict of double sucide. Later investigation, however, revealed facts which, it is said, tended to show that Mitchell drugged his wife and caused her death and then committed suicide by the same means.

A Weather Stone.

A writer tells of a curious stone that is to be found in Finland. It is a natural barometer and actually foretells probable changes in the weather. It is called a semaknir, and its peculiarity is that it turns black before approaching rain, while in fine weather it is mottled with spots of white. Investigation has shown the stone to be a sort of fossil, mixed with clay, rock salt and niter. When the air is moist, the salt turns black; when the air is dry, the salt shows in white spots on the surface of the stone.

Perfumes.

Perfumes exercise a peculiar influence over one's nervous system. A faint, subtle odor is nearly always enervating, while a pungent, rich perfume often has a bracing effect. Civet induces drowsiness, a faint breath of musk invigorates and the perfume of the aloe and the citron is positively soothing and comforting. The delicate, spicy odors of pinks, carnations, apple blossoms and sweetbrier are thought to be beneficial.

Evolution.

Summer resorts go through three stages.

First.—People go there to enjoy themselves.

Second.—People go there to divert themselves.

Third.—People go there to flaunt themselves. Then the place is fashionable.—Life.

Safest Place In Trains.

"I have one rule for my family when they travel," said the conductor of the suburban train, "and that is for them never to ride in the rear coach or the first one and, preferably, not in the coach next to the last or first. The reason for it is so obvious that I should think the foremost and last cars of a train would have scant patronage from anybody who reads of railroad accidents. If there is a smashup, those are the coaches that suffer. It seems strange that some kind of a buffer is not put behind the locomotive tender and at the rear of the train. How many lives would be saved by a device of the kind one has only to study the statistics of railroad accidents to figure out for himself."—New York Press.

Lifting a Kettle of Hot Water.

Some time when the teakettle is bubbling and boiling on the kitchen range lift it quickly by its handle and set it on the open palm of your other hand. This sounds like a very foolhardy thing to do—as if your hand might be blistered in a twinkling—but you will find that you can hold the teakettle which has just come from a roaring fire for some time without hurting you. Try it and then see if you can tell the reason why you are not burned. Be sure, however, that the water is boiling strongly before you make the experiment.

A Kippered Pastor.

A French Protestant pastor was the guest of a Scottish preacher at a manse. One morning kippered herrings were served at breakfast. The French pastor asked the meaning of "kipper." His host replied that it meant "to preserve." On taking his leave next day the French pastor, wringing his host's hand, said, "May the Lord kipper you, my good friend."

Postage Stamps.

Postage stamps are peculiarly liable to become septic and to convey deadly germs, says the British Medical Press and Circular, a fact that cannot be too widely known to the public who find in it a popular substitute for sticking plaster.

Never Missed It.

Teacher — Who discovered America? Small Boy—Dunno. Teacher—Why, I supposed every boy in school knew that. Small Boy—I didn't know that it was lost.

Somewhere.

"Pardon me, madame, I think I have seen you somewhere."

"Very likely. I go there very often."—Le Sourire.

If thou love learning thou shalt be learned.—Socrates.

DEATH DEALT BY SHAKY HAND

Drunken Man Fails to Rob but He Murders.

Kansas City, Nov. 27.—In an attempt to hold up and rob J. Frank Emery, proprietor of the Kentucky house, a second rate hotel at 905 North Sixth street in Kansas City, Kans., Emery was shot and killed and Lee Simons, a negro porter, was shot in the sholder and slightly wounded. Charles Rumble, aged 32, an iron molder, from Independence, Mo., one of the would-be robbers, was shot in the cheek by officers, who pursued him and Sam Hutton.

Rumble and Hutton were intoxicated. They entered the hotel, and walking over to the desk, told Emery to hand over his money. No guests were in the lobby at the time. Emery told them to get out, that he had no money. The men staggered from the desk apparently to make their departure. When they reached the door, however, Rumble braced himself against it and with a shaky hand fired two shots at the hotel proprietor. Guests rushed into the lobby and found Emery dead, lying across the hotel register, which was spread open on the clerk's desk. One bullet from Rumble's revolver went wild. The second had pierced Emery's chest just below the heart, causing almost instant death.

Rumble and Hutton fled down the stairway. There they encountered Simond, the porter, who had been attracted by the shots and was just ascending the steps. Rumble fired a shot at Simon that struck the porter in the shoulder, and the robbers pushed by him and bolted for the street.

Rumble and Hutton were seen by the officers on Minnesota street, a block away from the hotel, and gave chase, firing as they ran. One bullet struck Rumble a glancing blow on the cheek and caused the molder, because of his drunken condition, to stagger and fall. Hutton stopped and the pair were soon landed in jail.

Always Was Sick.

When a man says he always was sick, troubled with a cough that lasted all winter—what would you think if he should say he never was sick since using Ballard's Horehound Syrup? Such a man exists. Mr. J. O. Clark, Denver, Colorado, writes: 'For years I was troubled with a severe cough that would last all winter. This cough left me in a miserable condition. I tried Ballard's Horehound Syrup and have not had a sick day since. That's what it did for me." Sold by W. M. Johnson.

Had Stormy Voyage.

New York, Nov. 27.—Four four days 1,500 immigrant passengers on arrived Monday from Genoa and Naples, were kept below decks while the steamer pitched and rolled in a gale which at times assumed almost the proportions of a hurricane The Florida came through safely, however, and none of her passengers suffered any permanent injury. On the night of Nov. 24, four or five great water-spouts were sighted, some of them very near the steamer.

Rawlings Case to Supreme Court

Valdosta, Ga., Nov. 27.—In superior court Monday John R. Cooper, lawyer, for J. G. Rawlings, his sons, Milton and Jesse Rawlings, moved that verdicts in cases be set aside on ground that records did not show that they were present during trial or when verdicts were rendered. Judge Mitchll refused to consider motion as Georgia law does not require records to make such showing. Mr. Cooper then filed appeal from decision and court refused to sign appeal. Case now goes to supreme court again on this technical point It remains to be seen whether Governor Terrell will again grant respites on these grounds. Rawlings and Alf Moore were to be hanged one week from Tuesday, and the two boys the Friday following.

A Year of Blood.

The year 1903 will long be remembered in the home of F. N. Tacket of Alliance, Ky., as a year of blood, which flowed so copiously from Mr. Tacket's lungs that death seemed very near. He writes: "Severe bleeding from the lungs and a frightful cough had brought me at death's door, when I began taking Dr. King's New Discovery for Consumption, with the astonishing result that after taking four bottles I was completely restored, and as time has proven, permanently cured." Guaranteed for sore lungs, coughs and colds, at all drug stores. Price, 50c and $1. Trial bottle free.

Want Tillman Gagged.

Chicago, Nov. 27.—A committee of negroes, headed by Rev. A. J. Casey, pastor of Bethel M. E. church called upon Mayor Dunn and asked that he use the police force if necessary to prevent the delivering of an address on the race question by Senator Tillman next Tuesday night, on the ground that the address would be a menace to public safety. Mayor Dunn, after receiving the committee wrote a letter to Mrs. Adele Keeler, secretary of the Chicago Union hospital, for the benefit of which Senator Tillman is to speak, declining to act as chairman at the meeting.

There is No Reason

Why your baby should be thin, and fretful during the night. Worms are the cause of thin, sickly babies. It is natural that a healthy baby should be fat and sleep well. VERY DIFFICULT TASK.

Is Compilation of Confederate Post of Roster of Officers.

Washington, Nov. 27.—The compilation of the confederate part of the roster of officers and enlisted men of the Union and Confederate armies provided for in an act of congress in 1903, has been footed by the war department to be a difficult task on account of the incompleteness of the Confederate connection in possession of the department.

During the year a considerable number of records of North Carolina and Virginia confederate organizations and a few organizations from Florida, Mississippi and Texas, were received by loan and these were carefully copied. During former years the work had progressed well from records from Alabama, Arkansas, Florida, Georgia and Kentucky. In order to make the rosters as complete as possible data is being taken from the union records of confederate prisoners. Up to date the whole number of index record cards presented from the Confederate roster is 3,360,441.

YOUR HAT

May Be a Stylish One, But It Makes Trouble.

A man usually buys a hat that's "in style," but the modern hat for men has lots to answer for.

Baldheads are growing more numerous every day. Hats make excellent breeding places for the parasitic germs which sap the life from the roots of the hair.

When your hair begins to fall out and your scalp is full of Dandruff it is a sure sign that these countless germs are busily at work.

There is but one way to overcome the trouble and kill the germs—that way is to apply Newbro's Herpicide to the scalp—it will kill the germs and healthy hair is sure to result.

Sold by leading druggists. Send 10c. in stamps for sample to The Herpicide Co., Detroit, Mich.

PROUD OF CROPS.

The question is asked by a Chicago newspaper, "Why not be proud of the great crops that are being raised this year on the farms?" Of course the farmers are proud of their crops, and the tradesmen are proud of them, and the merchants rejoice and the manufacturers are glad. Proud of the great crops? Certainly. It is strange that one should ask such a question.

The crops are bumper ones this year. They will surpass those of 1905 by several millions in value. And the crop of last year was no small one—certainly not one to be ashamed of.

In all the world there is no country where such great, varied and valuable crops are produced as on the American farms. Markets are near every acre of this land. The railroads absorb the surplus and transport it to the market centers of the country or the world. And that which is left behind will not be sold for a cent less than what it could be sold for farther away; or, putting it another way, nothing will be shipped away for less than it will bring at home. In other words good prices prevail everywhere. The good crop means an abundance of distributed new wealth.

THE GREAT DANGER.

According to Mr. Carnegie, the very gravest of the dangers that beset young men who aim at success in business is the habit of intoxicating liquors. He says in his book, "The Empire of Business:"

"The first and most seductive peril, and the destroyer of most young men, is the drinking of liquor. I am no temperance lecturer in disguise, but a man who knows and tells you what observation has proved to him; and I say to you that you are more likely to fail in your career from acquiring the habit of drinking liquor than from any or all of the temptations likely to assail you. You may yield to almost any other temptation and reform—may brace up, and, if not recover lost ground, at least remain in the race, and secure and maintain a respectable position. But from the insane thirst for liquor escape is almost impossible. I have known but few exceptions to this rule."

SENSIBLE ADVICE.

The habit of indulging in the use of profane or obscene language is one of the most nonsensical habits a human being ever acquired. No man or youth ever raised himself in the estimation of saint or sinner by the use of foul language. Purity of thought and speech are valuable virtues. And yet, its our honest opinion that the man who unwittingly "cusses" a little now and then is not half so big a sinner as the fellow who continuously thinks evil and speaks evil of his neighbors, and refuses to pay his honest debts upon the theory that "Jesus paid it all, all the debt I owe." If the pulpits of the land would "go after" the fellows who refuse to pay their honest debts and to love their wives and their fellow-men—"go after" them as vigorously as they go after the fellows who "cuss and chew tobacco,"—the true reformation of the race might be nearer at hand.

The husband of one of the "suffragettes" imprisoned in London for rioting in the House of Commons will subscribe $50 a day to the woman's suffrage fund as long as his wife remains in jail. It may be worth that to him.

The great fall of Leonids that was expected in November has not yet occurred, and scientists and others are disappointed. So far there have been only two—Count de Castellane and Tom Platt.

The Mercury, an illustrated sheet established at DeLand as an administration organ, has "turned up its toes." The defeat of the drainage amendment is said to be largely responsible for its demise.

According to the latest returns the drainage amendment was "snowed under" in the election on November 6th by 5,007—over two to one. All the other amendments were defeated.

The people of New York do not seem to be elated over District Attorney Jerome's movement on the gambling houses when dangerous criminals stalk about with impunity.

When it comes to considering the proposition to abolish birthdays the small boy and the bank clerks will strenuously object to having George Washington's abolished.

The Canadians are also very prosperous; but their benighted and bungling government is going to so revise the tariff as to modify its protective iniquities.

"The country needs no more railroads," says Mr. Harriman. Perhaps that's the reason Mr. Harriman is appropriating so many of them to himself.

WAYS OF THE TOAD.

Some of the Oddities of This Peculiar Creature.

It is remarkable that the toad, loving water as it does, should wander away from watery regions to dry ground, where it can never see a drop of water except at rain time and leave its water rights to the undisputed possession of its ranal neighbor the frog. How the toad loves water must be known to every garden lover. Whenever there is a shower the creature leaves its cool retreat under the piazza or shed and stands as far as its fore legs will let it, erect in the rain, apparently enjoying to the utmost the shower bath.

Whenever they are near the water at breeding time they deposit long, slimy strings of eggs, and the young toad has to go through the tadpole stage in common with his brother frog. But when they are wholly excluded by distance from the water they seem to have the power of being viviparous, or bringing forth their young alive. In the water fertilization is effected in the same manner as in fishes, but the method in the land life career is not known. About all that is known is that confined toads are found with little toads, no larger than house flies, about them after a time, and in walled gardens and places far removed from water little toads, no larger than peas, wandering around on their own resources and which could never have been tadpoles, are within common experience.

G.B.Burhans Testifies After Four Years

G. B. Burhans of Carlisle Center, N. Y., writes: "About four years ago I wrote you stating that I had been entirely cured of a severe kidney trouble by taking less than two bottles of Foley's Kidney Cure. It entirely stopped the brick dust sediment, and pain and symptoms of kidney disease have disappeared. I am glad to say that I have never had a return of any of those symptoms during the four years that have elapsed and I am evidently cured to stay cured, and heartily recommend Foley's Kidney Cure to anyone suffering from kidney or bladder trouble." J. W. McCollum & Co.

A Limited Vocabulary.

If a person's knowledge of English were confined to one word, which would be the most useful? This subject was once discussed in the presence of Queen Caroline, her majesty entering into the question vigorously, according to the Dundee Advertiser. The greater number of the company fixed on "yes." One lady decided on "no," for, she argued, "though yes never means no, no very often means yes." How many men will indorse this? After all, one word would be as a drop in the ocean of our English language. A young woman who had learned a few Irish words without understanding them lost herself in the mountains. Meeting a handsome young peasant, she tried her Irish on him. Pat looked astonished, then pleased, and, rubbing his sleeve across his mouth, said: "Arrah! Do ye mane it, miss?" The girl, in her ignorance, had asked him for a kiss.

A Gift of Solomon's.

In the ancient cathedral of Genoa a vase of immense value has been preserved for 600 years. It is cut from a single emerald. Its principal diameter is twelve and one-half inches and its height five and three-fourths inches. It is kept under several locks, the keys of which are in different hands, and it is rarely exhibited in public, then only by an order of the senate. When exhibited it is suspended round the neck of a priest by a cord, and no one is allowed to touch it but him. It is claimed that this vase is one of the gifts which were made to Solomon by the queen of Sheba.

Lope de Vega.

Lope de Vega, the famous Spanish dramatist and poet, lived from 1562 to 1635. His literary work began when he was about thirteen years old, and from that time until his death, a period of sixty years, he poured forth an enormous quantity of plays, dramatic compositions of all kinds, poems of every character, breathing every spirit from the strictest asceticism to the most unbridled license. Over 1,800 plays are credited to him, and the published collection, comprising about 300, is contained in twenty-eight volumes.

Made Happy For Life.

Great happiness came into the home of S. C. Blair, school superintendent at St. Albans, W. Va., when his little daughter was restored from the dreadful complaint he names. He says: "My little daughter had St. Vitus' dance, which yielded to no treatment but grew steadily worse, until as a last resort we tried Electric Bitters, and I rejoice to say, three bottles effected a complete cure." Quick, sure cure for nervous complaints, general debility, female weaknesses, impoverished blood and malaria. Guaranteed by all drug stores. Price, 50c.

Marriages In Bible Times.

From the Bible accounts of the marriages of Jacob with Leah and Rebecca and from other narratives of marriages in Jewish history it seems that marriage was not held to be a sacrament or religious rite in the times of the patriarchs. In those days the head of the family, the father, was priest and ruler of the family and the only priest or ruler whose authority it recognized. As far as we learn from the Bible narrative in the case of Jacob's marriages, the simple giving of his daughters by Isaac constituted the marriage, there being no religious or other ceremony whatever. Of course, however, marriages made in this way were just as sacred and just as binding as those performed in the most ceremonious manner. In these days in Protestant countries the marriage laws do not look upon marriage as a sacrament, but only as a civil contract, though most people prefer to give it a certain religious sanction by having it performed by a church minister.—St. Louis Republic.

David Hume and His Wine.

A jocular bequest of David Hume to his friend John Home was curious. Home liked claret and disliked port, calling it poison, and the two friends had many discussions on the subject. They also used to have disputes as to which of them took the proper way of spelling their common family name. The philosopher, about a fortnight before his death, wrote with his own hand the following codicil to his will: "I leave to my friend, Mr. John Home of Kilduff, ten dozen of my old claret at his choice and one single bottle of that liquor called port. I also leave him six dozen of port provided that he attests under his hand, signed John Hume, that he himself alone finished that bottle at two sittings. By this concession he will at once terminate the only two differences that ever arose between us concerning temporal matters."—New York Tribune.

Ringing In the Ears.

"Ringing" in the ears is a most peculiar condition. It is interesting to learn that, though the brain so distinctly receives an impression of sound, there is really no sound at all. The sensation is produced by derangement of the nerves of the ear, caused by poor circulation or such pressure and interference as come from hardened, excessive wax, boils, etc. Some one oddly remarked that when the ears were ringing they were "insane." Truly, they carry wrong impressions to the brain. They record things that do not happen.

Had a Close Call.

"A dangerous surgical operation involving the removal of a maligoant ulcer as large as my hand from my daughter's hip, was prevented by the application of Bucklen's Arnica Salve," says A. C. Suckel of Miletus, W. Va. "Persistent use of the salve completely cured it." Cures cuts, burns and injuries. 25c at all druggists'.

No Case of Pneumonia on Record.

We do not know of a single instance where a cough or cold resulted in pneumonia or consumption when Foley's Honey and Tar had been taken. It cures coughs and colds perfectly, so do not take chances with some unknown preparation which may contain opiates, which cause consumption, a condition that retards recovery from a cold. Ask for Foley's Honey and Tar and refuse any substitute offered. J. F. McCollum & Co.

DuBose is charged with misappropriating the bank's funds to the extent of about $40,000. He is a stockholder in the bank to an amount of $40,000, and it is said that DuBose made good the losses by turning over his stock. It is stated that his losses resulted from cotton speculation.

EARLY GENIUS.

Men Who Were Young In Years, but Old In Hours.

Davy made his epochal experiment of melting ice by friction when but twenty. Young was no older when he made his first communication to the Royal society and was in his twenty-seventh year when he first actively espoused the undulatory theory. Fresnel was twenty-six when he made his first important discoveries in the same field, and Arago, who at once became his champion, was then but two years his senior.

Forbes was under thirty when he discovered the polarization of heat, which pointed the way to Mohr, then thirty-one, to the mechanical equivalent. Joule was twenty-two in 1840, when his great work was begun, and Mayer, whose discoveries date from the same year, was then twenty-six, which was also the age of Helmholtz when he published his independent discovery of the same law. William Thomson was a youth just past his majority when he came to the aid of Joule before the British society and but seven years older when he formulated his own doctrine of dissipation of energy. And Clausius and Rankine, who are usually mentioned with Thomson as the great developers of thermo-dynamics, were both far advanced with their novel studies before they were thirty. We may well agree with the father of inductive science that "the man who is young in years may be old in hours."—Exchange.

CHINESE SKILL WITH AXES.

Carpenters of Cathay Will Compare With Occidentals.

In judging the performance of the native Chinese workman it is almost impossible to avoid the popular bias that addiction to their own methods and tools invariably bespeaks fatuous conservatism. Though this is in many cases true, it will often be found on careful observation that what has passed for a stubborn blindness to the virtue of innovation is in reality a keener perception of comparative merits than the judge himself was aware of.

This is particularly true of Chinese carpenters. While most of their commonest tools differ in some radical way from our own, it is never safe to assume the superiority of the western product. Their small ax, for example, is a beautifully balanced tool, and they are remarkably adept in the use of it, being able to work as true a surface therewith as can be obtained with an adz in the hands of the white man.

On heavy work it is customary for two to hew together on opposite sides, striking alternate blows. Both hands are used, and the recover is over the shoulder, alternate right and left. There is a freedom of swing with an accuracy of delivery that is a treat to watch, and the rapidity of blows is almost bewildering.—Engineering Magazine.

The Great Bustard.

The great bustard (Otis tarda), a bird still found in the southern provinces of Russia, is the heaviest European fowl. In size it exceeds the Norwegian blackcock. The old males attain a weight of thirty-five pounds, and where food is plentiful specimens weighing thirty-eight pounds and even forty pounds have been captured. These birds have disappeared from western Europe, where once they were almost as numerous as partridges, and are seen only in small flocks in the sand hills skirting the lower valley of the Dnieper and here and there along the north coast of the Caspian. The hen lays eggs as big as ordinary pears. A larger and heavier bird, the cassowary, is incapable of flight, but it can kick with the strength of a mule and uses the sharp bony quills of its wings as a cock uses his spurs.

A Lemon Instead.

"Do you know," a pretty bride of three months said to a friend the other day, "I think all these jokes about young wives having so much trouble with butchers and grocers and being cheated and all that is just too foolish."

"Then I presume you are getting on all right with yours, dear?" her friend inquired.

"Why, of course I am! Anybody would if they would just deal at a reliable place," the young wife declared. "Now, there is my grocer," she continued; "he is just as obliging and thoughtful as can be. The other day I ordered a dozen oranges, and when they came I found there were but eleven in the bag, so when I went to the store again I told him so.

"'Why, yes, ma'am,' he said, 'I know there were. I had put in a dozen, but I noticed that one of them was spoiled, and of course I wouldn't send you any but the best goods, so I took it out.'

"Now, don't you think that was nice in him to be so thoughtful and honest?" she concluded.—Harper's Weekly.

Granted In Advance.

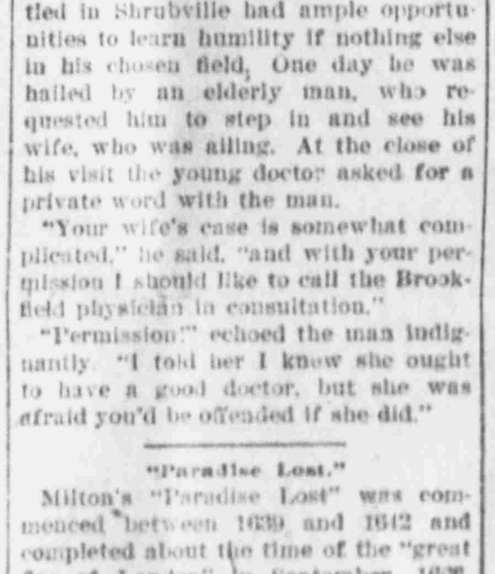
The young doctor who had lately settled in Shrubville had ample opportunities to learn humility if nothing else in his chosen field. One day he was hailed by an elderly man, who requested him to step in and see his wife, who was ailing. At the close of his visit the young doctor asked for a private word with the man.

"Your wife's case is somewhat complicated," he said, "and with your permission I should like to call the Brookfield physician in consultation."

"Permission!" echoed the man indignantly. "I told her I knew she ought to have a good doctor, but she was afraid you'd be offended if she did."

"Paradise Lost."

Milton's "Paradise Lost" was commenced between 1639 and 1642 and completed about the time of the "great fire of London" in September, 1666. Its author composed it in passages of from ten to twenty lines at a time and then dictated them to an amanuensi usually some attached friend. It was first published in 1667 by one Samuel Simmons, and a second edition appeared in 1674. For these two editions Milton received £10 and his widow £8 more.—London Graphic.



Why suffer with pain when BALLARD'S SNOW LINIMENT WILL CURE

Sold and Recommended by W. E. JOHNSON, Gainesville.

A Pretty Experiment.

A very pretty effect may be produced by using some aniline dye in powdered form in alcohol. Fill a small glass with the alcohol and drop the smallest portion of the dye on its surface. It will shoot down through the liquid, like a strand of color, dividing into two branches, which will subdivide again and again until you have, apparently, an inverted plant in miniature growing before your eyes. An arrangement of mirrors may be made to throw the reflection of this on a screen or a wall, and the enlarged shadows will be very interesting to watch.

Be Charitable

To your horses as well as to yourself. You need not suffer from pains of any sort—your horses need not suffer. Try a bottle of Ballard's Snow Liniment. It cures all pains. J. M. Roberts, Bakersfield, Mo., writes: "I have used your Liniment for ten years and find it to be the best I have ever used for man or beast." Sold by W. M. Johnson.
